Yashwantgad Fort Location Details

The fort is located 33 km from Sawantwadi and 26 km from Vengurla. It is accessed through crumbling gateways that lead through the surrounding forest and past a deep trench encircling part of the structure. Upon reaching the main entrance, visitors will pass through several small rooms and corridors, where tree roots cascade over the fort's walls. These paths lead to the vast, roofless inner chambers of the citadel, which have long been reclaimed by nature. Animals such as langur monkeys and drongo birds can often be seen at the fort.
